

Harshit Somani

Cybersecurity Engineer • AI Developer • Security-Focused Web Developer
Bhilwara, Rajasthan • +91 9414832105 • harshitsomani2005@gmail.com
LinkedIn • GitHub

Professional Summary

Cybersecurity engineer with expertise in penetration testing, SIEM development, and AI-driven security solutions. Proficient in red team tactics, threat detection, and secure application design. Built production-grade security tools including a Mini SIEM and ML-based phishing detection system. Completed 50+ advanced cybersecurity labs with hands-on exploitation and incident response experience.

Technical Skills

Cybersecurity Tools

Nmap, Burp Suite, Metasploit, Wireshark, Hydra, John the Ripper, SQLmap, Netcat

Blue Team

SIEM Operations, Log Analysis, Threat Detection, Incident Response, Threat Hunting

Red Team

Penetration Testing, Vulnerability Assessment, OSINT, Web Exploitation, Network Enumeration, Privilege Escalation

Programming & Development

Python, Bash, JavaScript, SQL, HTML, CSS, PHP, Flask

Web Development & Security

Flask, Secure Authentication, OWASP Top 10, Web Security, Backend Integration, Responsive Design

Security Frameworks & Standards

OWASP Top 10, MITRE ATT&CK, Role-Based Access Control (RBAC), Password Security Standards

Operating Systems

Kali Linux, Ubuntu, Windows

Security Tools Built

Mini SIEM

- Developed centralized log ingestion and analysis platform with Python
- Implemented detection rules targeting brute-force attacks, port scans, and abnormal login behavior
- Integrated MITRE ATT&CK mapping with severity-based alerting and incident tracking

Phishing Detection System (Machine Learning)

- Built Flask-based detection platform using ML models for email and URL analysis
- Engineered URL and email feature extraction to identify malicious indicators
- Deployed confidence scoring and security recommendations for end-user guidance

AI Systems

Zenox AI

- Designed and developed modular AI assistant system with focus on automation and intelligent task execution
- Implemented tool integration architecture enabling workflow automation and productivity features
- Built with security-first architecture principles for safe execution environments

Freelance Web Development Projects

Balaji Collection — Business Website

- Developed responsive single-page application for fabric business with mobile-first design

- Optimized performance and implemented modern web standards

Balaji Collection — SaaS Platform

- Designed and built SaaS-based business management platform with secure architecture
- Implemented role-based authentication, secure session management, and scalable backend infrastructure

Null Trace Security — SaaS Security Platform

- Built comprehensive SaaS-based cybersecurity platform with modular architecture
- Designed security tools, monitoring systems, and threat intelligence integration

Additional freelance projects currently in development.

Cybersecurity Experience

Ethical Hacking Labs — TryHackMe

- Completed 60+ advanced cybersecurity labs including Root Me, Mr. Robot, and Basic Pentesting
- Practiced exploitation techniques: SQL Injection, XSS, file upload vulnerabilities, and authentication bypass
- Performed network enumeration, privilege escalation, and Linux system exploitation

Technical Projects & GitHub

- **Mini SIEM:** Python-based log analysis and threat detection platform with MITRE mapping
- **Phishing Detection System:** ML-powered email and URL analysis with confidence scoring
- **Zenox AI:** Modular AI assistant with security-first architecture and tool integration
- **Security Automation Scripts:** Custom tools for vulnerability scanning and exploitation
- **Security Research Projects:** OWASP exploitation demonstrations and threat analysis tools

Education

Bachelor of Computer Applications (BCA)

Maharshi Dayanand Saraswati University, Ajmer (2023 – 2027)

Advanced Diploma in Cyber Defense

Red Team Hacker Academy (Ongoing)

Certifications & Achievements

- 60+ TryHackMe Labs Completed
- 20+ Vulnhub CTF Challenges Solved
- Analyzed 30+ Real-World Cybersecurity Scenarios
